National Aeronautics and Space Administration.
MECHANISM OF THE OXIDATION OF NICKEL AND
CHROMIUM ALLOYS. D. V. Ignatov and R. D.
Shamgunova. March 1961. 104p. OTS price, \$2.50.
(NASA TECHNICAL TRANSLATION F-59. Transla-
tion of Russian book, published in Moscow, 1960.)

The principal methods of investigating the oxidation
process of metals and alloys in gaseous media at in-
creased and high temperatures (400°-1,050°) are
described. The main results of experimental works
on the investigation of the oxidation kinetics and on
the structure and composition of oxide films are de-
scribed. Modern theories of the oxidation of metals
and alloys are reviewed, and the possibility of using
them to explain the oxidation mechanism of Ni-Cr
alloys is considered.
